

ARCHIVE
for
HISTORY OF EXACT SCIENCES

Edited by
C. TRUESDELL

Volume 43

SPRINGER-VERLAG
1991/1992

The exclusive copyright for all languages and countries, including the right for photo-mechanical and any other reproduction, also in microform, is transferred to the publisher.

Die Zeitschrift sowie alle in ihr enthaltenen einzelnen Beiträge und Abbildungen sind urheberrechtlich geschützt. Jede Verwertung, die nicht ausdrücklich vom Urheberrechtsgesetz zugelassen ist, bedarf der vorherigen schriftlichen Zustimmung des Verlags. Das gilt insbesondere für Vervielfältigungen, Bearbeitungen, Übersetzungen, Mikroverfilmungen und die Einspeicherung und Verarbeitung in elektronischen Systemen.

Fotokopien für den persönlichen und sonstigen eigenen Gebrauch dürfen nur von einzelnen Beiträgen oder Teilen daraus als Einzelkopien hergestellt werden.

Jeder Autor, der Deutscher ist oder ständig in der Bundesrepublik Deutschland lebt oder Bürger Österreichs, der Schweiz oder eines Staates der Europäischen Gemeinschaft ist, kann unter bestimmten Voraussetzungen an der Ausschüttung der Bibliotheks- und Fotokopiertantiemen teilnehmen. Nähere Einzelheiten können direkt von der Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, W-8000 München 2/FRG eingeholt werden.

Hinweis gemäß § 4 Abs. 3 der Postdienst-Datenschutzverordnung: Bei Anschriftenänderung des Beziehers kann die Deutsche Bundespost Postdienst dem Verlag die neue Anschrift auch dann mitteilen, wenn kein Nachsendeantrag gestellt ist.

Hiergegen kann der Bezieher innerhalb von 14 Tagen nach Erscheinen dieses Heftes bei unserer Berliner Verlagsanschrift (Springer-Verlag, Heidelberger Platz 3, W-1000 Berlin 33/FRG) widersprechen.

Soll also ... niemandt für ungläublich halten / daß auß der Astrologischen
Nartheit und Gottlosigkeit / nicht auch eine nützliche Witz und Heyligthumb / auß
einem unsaubern Schleyem / nicht auch ein Schnecken / Müschle / Austern oder Aal
zum Essen dienstlich / auß dem grossen Hauffen Raupengeschmeyß / nicht auch
ein Seydenspinner / und endlich auß einem übelriechenden Mist / nicht auch etwan
von einer embsigen Hennen ein gutes Körnlein / ja ein Perlin oder Goldkorn herfür
gescharret / und gefunden werden köndte.

KEPLER

*Utilissimum est cognosci veras inventionum memorabilium origines, prae-
sertim earum, quae non casu, sed vi meditandi innotuere. Id enim non eo tantum
prodest, ut Historia literaria suum cuique tribuat et alii ad pares laudes invitentur,
sed etiam ut augeatur ars inveniendi, cognita methodo illustribus exemplis.*

LEIBNIZ

*Car on sait par l'expérience, que lorsqu'une recherche est fort épineuse, les
premiers efforts nous en éclaircissent ordinairement fort peu; & ce n'est que par des
efforts réitérés, & en envisageant la même chose sous plusieurs points de vue, qu'on
parvient à une connoissance accomplie.*

EULER

The ARCHIVE FOR HISTORY OF EXACT SCIENCES nourishes historical re-
search meeting the standards of the mathematical sciences. Its aim is to give rapid and full
publication to writings of exceptional depth, scope, and permanence.

The ARCHIVE casts light upon the conceptual groundwork of the sciences by dis-
covering their growth: the course of mathematical thought and precise theory of nature.
While devoted mainly to mathematics and natural philosophy, it also embraces experiment
in the physical sciences.

English, French, German, Italian, Latin, and Spanish are the languages of the
ARCHIVE. An author wishing to publish a paper in the ARCHIVE should submit his
manuscript directly to an appropriate Member of the Editorial Board.

The crabbed, vague, and verbose style often called "scholarly" is not acceptable.
Authors should reflect clear thought through chosen, specific words composed in direct,
responsible, and active syntax. Articles written in English should conform with the rules
and counsels set forth in Sir Ernest Gowers' *The Complete Plain Words*, especially Chap-
ters 6-9. The Editor cannot undertake to rewrite papers and therefore will return at
once to the Communicator such communicated manuscripts as he finds deficient in style,
form, or clarity.

CONTENTS OF VOLUME 43

BELL, J. F., The Late-Twentieth Century Resolution of a Mid-Nineteenth Century Dilemma Generated by the Eighteenth-Century Experiments of Ernst Chladni on the Dynamics of Rods	251
BERGGREN, J. L., Ptolemy's Maps of Earth and the Heavens: A New Interpretation	133
BOWEN, A. C., see GOLDSTEIN, B. R.	93
CASEY, J., The Principle of Rigidification	329
DONCEL, M. G., On the Process of Hertz's Conversion to Hertzian Waves	1
DUTKA, J., The Early History of the Factorial Functions	225
FREUDENTHAL, H., Nichteuklidische Geometrie im Altertum?	189
GARIO, P., Singolarità e Geometria sopra una Superficie nella Corrispondenza di C. Segre a G. Castelnuovo	145
GOLDSTEIN, B. R., & A. C. BOWEN, The Introduction of Dated Observations and Precise Measurement in Greek Astronomy	93
KRAGH, H., Relativistic Collisions: The Work of Christian Møller in the Early 1930s	299
MANCHA, J. L., Astronomical Use of Pinhole Images in William of Saint-Cloud's <i>Almanach Planetarium</i> (1292)	275
SHEYNIN, O. B., On V. Ya. Buniakovsky's Work in the Theory of Probability	199
TRUEDELL, C., Corrections and Additions for "Maria Gaetana Agnesi"	385
WARWICK, A., On the Role of the FitzGerald-Lorentz Contraction Hypothesis in the Development of Joseph Larmor's Electronic Theory of Matter	29

1. The first of these is the fact that the
the world is a very different place than it
was in the past. The world is now a
much more complex and diverse place than
it was in the past. This is due to a number
of factors, including the growth of the
world population, the development of new
technologies, and the increasing interdependence
of nations.

2. The second of these is the fact that
the world is now a much more interconnected
place than it was in the past. This is
due to the development of new technologies,
such as the Internet and air travel, which
have made it easier for people to communicate
and travel across the world.

3. The third of these is the fact that
the world is now a much more diverse place
than it was in the past. This is due to
the increasing number of people from different
cultures and backgrounds living together in
the same place.

4. The fourth of these is the fact that
the world is now a much more uncertain
place than it was in the past. This is
due to a number of factors, including the
growth of the world population, the development
of new technologies, and the increasing
interdependence of nations.

5. The fifth of these is the fact that
the world is now a much more complex
place than it was in the past. This is
due to a number of factors, including the
growth of the world population, the development
of new technologies, and the increasing
interdependence of nations.

6. The sixth of these is the fact that
the world is now a much more diverse
place than it was in the past. This is
due to the increasing number of people
from different cultures and backgrounds
living together in the same place.

7. The seventh of these is the fact that
the world is now a much more interconnected
place than it was in the past. This is
due to the development of new technologies,
such as the Internet and air travel, which
have made it easier for people to communicate
and travel across the world.

8. The eighth of these is the fact that
the world is now a much more uncertain
place than it was in the past. This is
due to a number of factors, including the
growth of the world population, the development
of new technologies, and the increasing
interdependence of nations.
